

MOLYDUVAL

Gloria MCM 50 IC

Orifice Paste for Glass

A black lubrication paste specifically designed as a swabbling compound to meet the highest demands for a clean thread moulds in glass bottle production. Specifically in those cases when the separation of a product becomes difficult.

Properties

- * high surface quality
- * high solid content
- * low risk of graphite carry over to the bottle
- * ready to use
- * enables free flow of the glass

Applications

* for preparation of glass moulds in production of high quality glass, especially for thread mould lubrication

Technical Datas

Color		black
Base Fluid		Min
Density 20°C	kg/m ³	960

The content of this manual is based on our current knowledge and experience in the development and manufacture of lubricants. Because of the complexity of tribological systems, the effect of our products depends on many parameters, which we cannot assess and which influence we cannot evaluate. For this reason general statements about the function of our products are not possible. The information in this manual, therefore, contains non-binding guidelines, which should give the technical trained reader information on possible applications. The information in this manual does not include property assurances or warranties or guarantees to the properties or suitability of this product in a specific application. Prior to its use it is absolutely necessary to test this product in the application to ensure that the product and its use is safe, economical and fully suitable. It should proceed with due diligence.
