

MOLYDUVAL

Tantalus M 32 P

Gear Circulating and Bearing Oil

High-quality industrial gear oil manufactured on the basis of selected mineral oil raffinates and an optimally coordinated, highly effective additive combination. Conforms to lubricating oils CL according to DIN 51517, part2. The viscosity classification corresponds to the ISO classification. Suitable for almost many types of closed circulation lubrication, also for normally loaded sliding and antifriction bearing, joints, guidance in the temperature range to 100°C as well as for hydraulic systems.

Characteristics

- oxidation resistant
- high viscosity index
- very good corrosion protection
- good low temperature characteristics
- good demulsifying properties

Applications

- for hydraulic equipment
- for gears of tool machines with in oil couplings
- for bearings, gearboxes and control systems in steam and gas turbines

Technical Datas

Color		yellow
Name		CL32
Viscosity 40°C	mm ² /s	32
Viscosity 100°C	mm ² /s	5,4
Density 40°C	kg/m ³	878
Pour point	°C	-24
Flash Point COC	°C	185
Colour ASTM		3
Pack Size can 5 l		+
Pack Size drum 200 l		+
Customs tariff number		340319
